Contact Details of the company...

Dear ... ,

I'm currently a student in the second year of a University Diplôme Universitaire de Technologie Informatique at the Institut Universitaire de Technologie in Limoges, equivalent to a two-year university full course diploma in Information Technology , I want to do a 10-week internship in your company.

Indeed, your company takes part in the sector which I would like to build my future career, the software development. Your company is known for the development of software in an area of health. Therefore, I want to integrate your structure as a trainee to participate in the development of this kind of software.

Since my first year of IUT, I have been able to acquire and improve certain skills like team work, during a tutored project, or the versatility and the good IT production methods during various projects realized during my diploma.

This internship will allow me to learn to put into practice the knowledge and skills that I acquired at the IUT and to take advantage of my internship to develop my experience and to acquire the ones that are specific to your company.

I look forward to hearing from you and I will be available for any questions you may have.

Yours sincerely.

Théo Pichon
